

Oxford Cabinets

Trendy Aesthetic: Furniture with Panel Applications

The doors feature a sound-absorbing panel application, consisting of a recycled PET felt layer and elegant light oak slats. The panel effectively absorbs sound, improves room acoustics, and adds a stylish design highlight. The furniture has a visible back panel, allowing free-standing placement in the room.

The furniture is PEFC-certified. The PEFC label stands for responsibly and sustainably managed forests and environmental protection. We contribute to the preservation of forests and support sustainable forestry practices.
